Protect your phone with google safe navigation. This version does not have a description of the Play Store, so we picked up one of the license 100.0.4896.30: Welcome to Chrome Beta for Android! Thus, the most recent beta version incorporates support for themes. Looking at the Gallery of Themes, it is clear that many of them are rich and too colorful to be usable. Google Chrome is a fast, easy to use and secure browser. They are frankly disturbing and difficult to face for hours a day. For the last but not least, on the new features, it is the expanded support for HTML5, including video and web workers tag functionality. When you start Session in Chrome, your favorites, passwords and settings will be automatically synchronized on all your devices. You can install Chrome Beta next to your current Chrome version for Android. First, the features. Sometimes, this can be a bit rough on the edges.) À € »Say anticipated feedback: Let us know what you think and help make Chrome for Android a better browser. You can navigate and navigate faster using your voice anywhere, anytime. Chrome has the Google Translate integrated to help you translate all the web to your own language with a touch. It is a matter of personalization and navigation in the way you want, and privacy. Browse fast and enter less. These are huge additions, as the Chrome New Tab page, although great in the concept, desperately needed in a way so that the users replaced the algorithm deciding what to put there. You can also set a selection so that it will not be replaced only because you visited some different sites for a week or more, and hide parts of the new tab with new layout buttons. Activate Lite mode and use to 60% less data.
